

## **Certeon Introduces New Virtualization White Paper**

*Server and Desktop Virtualization Are Synergistic with Virtualized Appliances*

**BURLINGTON, Mass.—July 13, 2010—**[Certeon](#), the leading provider of virtualized WAN optimization and application acceleration, today announced the availability of a new white paper on the topic of virtualization authored by well known industry analyst Dr. Jim Metzler of Ashton, Metzler and Associates and Webtorials, a leading IT market analysis firm.

The white paper, entitled “*Virtualization: Benefits, Challenges and Solutions*” focuses on three forms of virtualization:

- Server virtualization
- Desktop virtualization
- Virtualized appliances.

The white paper explores the significant synergies that exist among these three forms of virtualization. It also discusses how virtualized appliances can fully leverage server virtualization at branch offices and data centers. Additionally, the white paper covers the compelling advantages of virtualized appliances including the costs savings compared to hardware-based appliances and how virtual appliances can leverage hypervisor management systems for high availability.

The virtualization white paper can be downloaded from Certeon’s on-line [Resource Center](#).

### **About Certeon**

Certeon is the leader in virtualized WAN optimization. Certeon’s *aCelera* software is the first WAN optimization and application acceleration virtual appliance to deliver acceleration, scalability and manageability. *aCelera* reduces application response time over the WAN and lowers network bandwidth requirements up to 95 percent without proprietary hardware appliances. The *aCelera* family of software-based solutions includes *aCelera* virtual appliance and *aCelera Client* for optimized desktop-to-data-center performance and *aCelera Sync* for efficient business continuity over the WAN. As more resources (i.e., CPU, memory and disk) are added, *aCelera* performance scales linearly and supports up to 50 percent more concurrent accelerated connections than do “closed” proprietary hardware appliances. Enterprises and managed service providers can save as much as 60 percent in TCO when deploying *aCelera* software to virtualized data centers, cloud environments or remote offices. For more information, visit [www.certeon.com](http://www.certeon.com).
