Certeon Extends Global Reach with Attrix Technology Partnership

-- Value Added Reseller to Provide S-Series Application Acceleration to Asia-Pacific Region --

BURLINGTON, Mass. – July 30, 2007 – [Certeon](#), the industry’s first vendor to provide Application Intelligent Networking™ for significantly accelerating applications securely over wide area networks (WANs), today announces the addition of [Attrix Technology](#) to its [Partner Acceleration Program](#). As a certified value-added reseller in the Asia-Pacific region, Attrix will leverage Certeon’s S-Series™ Appliances to deliver enterprise application acceleration and alleviate slow application response times caused by network bandwidth and latency issues.

Attrix has domain knowledge in design manufacturing and collaborative applications. The company chose the Certeon solution because of its unique application intelligence and end-to-end security approach. With knowledge of regional product design needs, as well as the Asia-Pacific manufacturing market, Attrix is able to accurately target end users of large UGS Solid Edge™ and other CAD applications within distributed Product Lifecycle Management (PLM) environments. Certeon’s S-Series is pre-loaded with an Application Acceleration Blueprint™ for Solid Edge, which contains specific knowledge of the application at the object level—allowing Certeon to speed response times for Attrix’s Solid Edge users by more than 1,000 percent.

“Attrix’s customers are dispersed across the globe and require rapid and secure access to applications such as Microsoft SharePoint and UGS Solid Edge,” said Lee Chee Leong, general manager of Attrix Technology. “Before partnering with Certeon, we did not have a solution that increased network performance, application performance and security. We can now provide our customers with solutions that deliver high performance and security for their manufacturing, financial and insurance applications.”

Certeon offers three models of Application Acceleration Appliances: the S-1000, S-2000 and S-3000, supporting small branch offices, regional offices and large data centers, respectively. In

addition to the Solid Edge Blueprint, Certeon has Application Acceleration Blueprints for 2007 Microsoft® Office™, MOSS 2007, Microsoft File Services (CIFS), EMC® Documentum® and eRoom®, as well as SharePoint and Office 2003. Certeon's S-Series accelerates all WAN traffic including encrypted SSL traffic to ensure end-to-end data security and integrity.

“Our enterprise customers conduct business around the globe, and it's paramount that our sales channel reach extends globally as well,” said Peter Dougherty, CEO Certeon. “Adding Attrix to our Partner Acceleration Program further solidifies our presence in the Asia-Pacific region. We look forward to working with Attrix to help its customers receive the benefits of secure Application Intelligent networking.”

About Certeon

Certeon's S-Series Application Acceleration Appliances provide the industry's first solution for Application Intelligent Networking to deliver application acceleration, security and scalability from the desktop to the data center. Certeon's patent-pending S-Series appliances accelerate all WAN traffic and are optimized for distributed content delivery and collaboration applications such as: enterprise content management, work flow and process management, Web portals and search. The appliances minimize network traffic to significantly improve application response times, while maintaining end-to-end security. Founded in 2003, Certeon is a private company, headquartered in Burlington, Massachusetts with European offices in The Netherlands. For more information, visit www.certeon.com or call 781-425-5200.

About Attrix

Attrix Technology is a specialist value add distributor of leading edge, best-of-breed Computer Telephony Integration Products, Network Security and Monitoring Technology, as well as Wireless Technology. Attrix is committed to delivering a superior value-added experience from our principles to resellers and their end customers in the Asia-Pacific region. Attrix offers complete turnkey solutions, from sales to technical support; consulting services to training programs; installation support to logistics management.
